

Learning Objectives

This is a practical and interactive workshop for GPs, Nurses and Administrative staff:

- To practice effective management of adult, child and infant cardiac arrest situations using basic and advanced techniques.
- To assist in the planning/development of emergency procedures within the Practice.

Content

The workshop is based on the current (2015) UK Guidelines for Adult, Child and Infant cardio-pulmonary resuscitation (CPR) and includes:

- Conducting a Primary Survey
- Carrying out CPR on an Adult, Child and Infant in accordance with UK resuscitation guidelines
- Pocket Mask ventilation
- Introduction to AED
- Indications and Contra-Indications for use of AED
- Application and use of AED in simulated cardiac arrest scenarios
- Appropriate patient aftercare
- Anaphylaxis recognition and management

Educator

The course is provided by Occupational Training Solutions and candidates will be awarded a Certificate of Attendance which is valid for 1 year.

Frank Wood

BA (Hons) Ed. Reg. Paramedic

Frank began his career as a Paramedic within the NHS and continued to develop his clinical knowledge and skills as Paramedic Tutor teaching the national course. He is a Resuscitation Training Officer for Bristol Community Health and also acts as an advisor for GP practices in relation to the development of resuscitation training and associated equipment.
