- Macmillan Prevention & Re-enablement Project (LinkAge)
- Macmillan Buddies scheme
- Range of self-management courses (NBT, Penny Brohn, Macmillan HOPE)
- Practice nurse cancer training (Macmillan & UWE)

Living Well With and Beyond Cancer in Bristol

The National Cancer Strategy Goal is to radically improve the outcomes for people with cancer in England

Treatment Summary

- Increase in uptake in use of TS across BNSSG
- Quality audit carried out with Macmillan GP
- Development of best practice examples – breast completed
- Aim to roll this out across all cancer sites across SWAG Cancer Alliance

Cancer therapy

Select which cancer care patient is on

- Radiotherapy NEC
- Cancer chemotherapy

Last entry: O/E - height, 162.56 cm, 30/04/2007

Carer's details noted

Carer's details

- - Start with open questions and invite the patient to list concerns and questions.
- - Check the patient's understanding of aims of treatment.
- - Ask about current physical health and symptoms or side effects.
- - Assess emotional and psychological state and prompt for concerns about mood, body image and sexuality.
- - Ask how their family, friends and employers have reacted to their illness.
- - Give information about benefits, prescription exemption, etc.
- - Consider whether disease or treatment puts the patient at risk of other problems and whether extra surveillance is needed.
- - Discuss access to help out of usual surgery hours.
- - Assess the patient's and others' wishes for more information, now or later. Signpost to reliable sources.
- - Check medication needs and the patient's understanding of indications, schedules and side effects.
- - Offer your continuing support and clarify ways to contact you.

Can we lessen the impact?

Cancer Care Review

CANCER IN PRIMARY CARE

Suitable for:

Professionals

Format: **Toolkit**

Diagnosis and support of patients with cancer for general practitioners (GPs).

A range of scenarios showing good and bad experiences of patients when they present to their GP and how, on reflection, their experience could have been improved. It aims to build on, and ensure consistency in, existing communications skills of primary care professionals.

The Toolkit consists of:

- Downloadable workbook with training outcomes
- Case studies presenting typical GP consultations, relating to four cancer areas
- **The patient's voice** video clips of around 10 minutes each
